S.I.C. SECTION

This section indexes the state's manufacturers, processors, wholesalers and distributors according to Standard Industrial Classifications (S.I.C.). Developed by the U.S. Government, this system assigns each industrial process a four-digit number. Codes used are from the most recent manual published by the U.S. Government Office of Management & Budget. Refer to individual profiles for equivalent North American Industrial Classification System (NAICS) designations.

Companies are identified in alphabetical order within each of these four-digit classifications. Each entry contains the company name, address, telephone number, a company contact, employee count at this location and a partial description of the business. A ⋆ indicates a new entry added for this edition.
